# JUBILARIS

## WHAT IS THIS PROJECT?

The Jubilares Association proposes a model, methodology and an accompanying process which have been honed and proved over a number of decades. People who say "what if we retire together?" are assisted in finding (and sharing) information and looking for properties and financing.

## WHAT DIFFERENCE IS IT MAKING?

The aim of these communities is to recover the social relations and collaborative habits among neighbours, typical of life in small town and villages, which have gradually been lost in modern urban societies. These habits are especially valuable to the elderly... they want to live autonomously and independently without being institutionalised.
